Property Description

CASA VISTA VERDE "THE HOUSE" Designed and built to showcase the beauty of southern Costa Rica, this home has as much to offer on the outside as inside. Wide decks are cooled with fresh breezes and have big, deep views of forested mountains and the Pacific Ocean. Whether you are in a lounge chair on the deck with a cold drink or in the pool visiting with a few special guests, you will have a bird's eye view of the natural world with no neighbors in site. Those who have viewed the home have all exclaimed about its special setting. Just finished in early 2017, you will appreciate the design and attention to details that we appreciate in today's world, including an open living concept that includes a fully equipped kitchen with a large island, indoor/outdoor dining areas and living room. The plan was to make the transition from inside to outside seamlessly so you can fully enjoy both. With complete privacy, you can live however you feel comfortable, but still have lots of room for entertaining groups when you are ready.
