- New Projects

Property Description

Outdoor living was the inspiration when this home was designed. Three large gathering areas and four bedroom suites all with en-suite baths have made Casa Thai the most popular luxury vacation home in the neighborhood. Each suite elegant and different from the other, it will be difficult to decide which will be your master bedroom. Large recessed doors slide into the walls allowing the outdoors to become part of the entire home. In addition to the large kitchen the laundry room with additional half bath can double as a butlers pantry or staging area when you hire a chef and his crew to cater large gatherings. With an additional large outdoor kitchen, grilling station and dining area, guests can be a part of creating the days culinary creations or wait in anticipation of the delights to come. Casa Thai sits on the hillside within a community of homes with wide ocean views and easy access. Just minutes to the town of Uvita, the convenience of life is a short drive away.
