Property Description

This is a spectacular Home, perched on a hilltop, with incredible 360 degree view, separated from the pool with a wide patio for lounging or dining while enjoying the breathtaking sunsets all year around. Updated photos to better show the value of this spectacular Mountain Home. From the patio and pool is a 40 km view across the valley of the Great Terraba River, the Mangroves and the South Pacific Region of Costa Rica. This three-bedroom Home offers you the best view you have ever seen. It is several degrees cooler than on the coast, and is a scenic 7 km drive up a well maintained gravel road. This Home is fully furnished and has a self-contained one bedroom guest villa with its own pool and amenities. This is an ideal tropical residence for a family and its guests; it could also be a fulltime rental property or part time while you are away. Local responsible management is available, at reasonable cost, in the same community.
