Property Description

This luxury home is a contemporary masterpiece of a home combining luxury, modern architecture with an organic sense of being submersed in the rainforest that surrounds the home. The home was designed and built by an interior design specialist with the concept of blending the year round creek behind the property and rainforest of Valle Pura Vida into a luxurious living space. The home consists of a total of 5 bedrooms but is conveniently split with a main residence which has three bedrooms, three full bathrooms, a fully equipped kitchen, living and dining area that all open to a luxurious mosaic pool lofted above the creek below. The main house is built on two levels and everything about the property down to its exterior finishes and entry features ooze contemporary luxury with a tropical connection. There are water features throughout the property and home and upon entering the front door you are welcomed to a spacious dining and kitchen area which is integrated into the living space and pool area.
