Property Description

At this price, you won't find another home of this size and quality with this view anywhere. The views of the Pacific coastline including the Whale's Tail and Osa Peninsula are a treasure, and the home is surrounded by 13.3 acres of forest and a creek that ensure it's permanent privacy, potential for a network of hiking trails, and abundant wildlife. Located in the exclusive community of Costa Verde Estates in the Escaleras mountains above Dominical, Costa Rica, the main house has over 3,400 square feet of covered space with wide open views of the ocean. The first floor's high ceilings and open living floor plan open onto an outside terrace. There are 5 bedrooms altogether, two of them master suites on the first and second floors with their own bathrooms. One of the downstairs bedrooms has a separate outside entrance so would be perfect for a B&B or your personal guests. All 3.5 baths are designed for comfort and luxury.
