- Valley Views

Property Description

Casa Bambu is located 100 meters south of Hotel Kura, Bejuco Road, Uvita, Puntarenas. It has sweeping views of the Pacific Ocean and the famous Whales Tail. The property has a little over 1.5 acres of space and a large plantel ready to build your dream home. A recent survey was completed (2019) so everything will be ready for the next owner. Casa Bambu is 900sq' home with a one bedroom one bath layout with kitchen and living area. It was more designed as a guesthouse while you complete your main house. The home currently rents as a successful VRBO business which we have operated for 6 months of the year (when not owner-occupied). This would be a great way to continue generating income until the home is built on the upper plantel. The Casita is 400sq' plus a large deck which could later serve as parking for the main house. The Building site has great white water views of Whales Tail, Hermosa Beach, and river views.
