- Ocean View

Property Description

This is a super practical and comfortable home of solid steel and concrete with the most amazing sunset ocean and mountain views. The home is being offered turn-key, with all furniture, appliances, and even artwork (created by the owner, no less), included. The downstairs area has ample kitchen, living and dining areas. There are both screened and unscreened porch areas where one can take in the incredible views that surround the home from every angle. On the ground floor there is also a small bedroom, a full bath and a laundry room. Upstairs is the large master suite with full bathroom. The home is built with large windows throughout that bring in lots of natural light and, of course, the views. The home has gas heated water, a gas range and a gas clothes dryer. WiFi internet service is also available. There is a wide variety of fruit trees on the property and also a greenhouse. The 6,300 square meter lot offers plenty of space for a pool and even for the construction of casitas that would sit below the home and would not impede the view of the ocean from the main house.
