Property Description

With 2 wheel drive access this single story turnkey Asian style home consists of 3 master bedrooms all opening up to the central pool, patio, looking across the jungle out to the ocean. This home is perfect to entertain guests and or as a vacation rental property. With a live-in caretakers home below the two-car garage you have the opportunity to convert it to another bedroom or have a 24/7-property manager on site. Taking advantage of Costa Rica's year round warm tropical weather this home was built very open with the kitchen and dining area adjacent to the partially indoor/outdoor pool. With 12 foot vaulted ceilings this home was built to withstand the times using steel and block construction. Tucked in a jungle setting near the end of the road this property is very private and comes with an extra building site that you could segregate in the future and sell for a good return as it is far enough away from the main home to keep it private.
