Property Description

Perched at a perfect elevation overlooking the town of Uvita and the famous Whales Tale is where this spectacular real estate sits. The expansive ocean views put the Ballena National Marine Park in the center spot for you binocular whale watching afternoons. The property consists of an existing "Studio" structure where you can live as you build your main home or homes. Yes, there is an extra site below the main that could be a myriad of concepts: extra home, massive gardens, nursery of exotic colors and the list goes on. There is a nice internal road from the public access road. Electricity it on the public road and water comes from an old spring above in the mountains. This is one of the finest view properties around. And with lots of usable land, plenty of natural trees, with ample wildlife, you can consider this to be a dream maker!
