Property Description

Casa Aracari is a 2 story home with a total 88 sq meters (950 sq feet) of living space. Included is a large plunge pool with jets, a viewing deck nestled in the tree canopy, outdoor shower, high end living quarters & decor including granite tops, AC, porcelain floors, stainless steel appliances, fine art and furniture with jungle and ocean views. There is also a bench with tables covered by a steel umbrella overlooking the Pacific Ocean, which is perfect for coffee at sunrise and cocktails at sunset. The house is compact but resembles a classy hotel suite and is perfect for couples. It's a single room "honeymoon suite" but downstairs can be renovated into another room if necessary. This is 100% private with no neighbors within shouting distance. With a 500 foot long driveway enveloped in tropical plants, trees and flowers, this is the perfect location for anybody seeking absolute privacy.
