Property Description

This is a signature luxury modern residence at the top of the private hills of Tres Rios. The design is a contemporary take on Bauhaus modernism, featuring steel and glass construction that uses clean lines and open spaces to create a natural flow between the domestic interior and natural exterior of the jungle. The spectacular floating entrance leads to an open 3-bedroom, 2.5 bath home with a 2-car garage seamlessly combines a love for modern design, and state of the art technology with a deep respect for nature's organic beauty. The crown jewel of the house is the incredible 71m2/765ft2 infinity pool, overlooking the enthralling panorama view of the Pacific Coast. The three bedrooms, each with its own exquisite view, are laid out on a single-story, with a separate master bedroom and guest room wings on opposite sides of the home to maximize privacy and comfort. The master bedroom opens onto the sunset view of your dreams, to be enjoyed directly from the bed.
